I have several issues with the proposed correspondence. Procedurally, I do not favor the levying of a formal reporting requirement on the manager of the NNSA Nuclear Production Office. If the matter at hand is not important enough to warrant a reporting requirement levied on the Administrator, then it is not important enough to justify Board action at all. The Board staff should be able to deal directly with the NPO manager. I also feel the wording of the letter is awkward. I'm not sure the last sentence of the first paragraph is a properly constructed sentence.

More importantly, I do not understand why the post-seismic confinement ventilation performance is of concern to the Board. Preliminary analysis of the postulated accident shows that there is no concern for the adequate protection of the public health and safety, regardless of a failure of confinement. While an active confinement ventilation system or alternate defense-in-depth approach would no doubt improve safety, such improvements above and beyond the adequate protection standard are appropriately subjected to a cost-benefit analysis. Our agency has no capability to perform our own cost-benefit analysis, nor can we second guess one conducted by NNSA. Therefore, I do not see how the information requested will be used.

Sean Sullivan
