

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

November 24, 2023

TO: Timothy J. Dwyer, Acting Technical Director
FROM: L. Lin, Z.C. McCabe, and E.P. Richardson, Resident Inspectors
SUBJECT: Savannah River Site Activity Report for Week Ending November 24, 2023

E-Area: WIPP returned an Inner Containment Vessel in a HalfPACT to SRS earlier this year following their discovery of alpha contamination (see 10/06/23 report). SRS Radiological Protection Department (RPD) personnel found no contamination after performing extensive surveys of the Inner Containment Vessel and the Standard Waste Box inside. WIPP accepted the survey results and authorized the container's return, which departed SRS last week.
