**DEFENSE NUCLEAR FACILITIES
SAFETY BOARD**

Washington, DC 20004-2901

September 14, 2010

Mr. Leo Sain
Executive Vice President
Performance Assurance and Operations
URS Corporation
106 Newberry Street, SW
Aiken, SC 29801

Dear Mr. Sain:

The Defense Nuclear Facilities Safety Board (Board) is holding a Public Hearing and Meeting on October 7-8, 2010, to consider safety related design topics of the Department of Energy's (DOE) Waste Treatment and Immobilization Plant Project (WTP) at the Hanford Site. The focus of this hearing and meeting is the Pretreatment Facility in the areas of pulse jet mixing, delivery of feed from the High Level Waste Tank Farms, the Pretreatment Facility safety basis, and hydrogen control.

The Board requests your appearance to present important insights to the Board and DOE regarding safety related concerns related to the delivery of feed to WTP. In order to efficiently accomplish the Board's goals, the format for this meeting and hearing will be limited to your responding to questions from the Board members—prepared statements will not be necessary, but can be, if you choose, submitted for the official record of the meeting and hearing. The agenda for the meeting and hearing is posted on the Board's web page, http://www.dnfsb.gov/pub_docs/public_hearings/all/ph.php (<http://www.dnfsb.gov>). The agenda will be updated periodically as preparations for the meeting and hearing are finalized.

Sincerely,

A handwritten signature in black ink, appearing to read "Peter S. Winokur".

Peter S. Winokur, Ph.D
Chairman
